Quality and Environmental Policy of Coding S.r.l.

CODING has always set itself the objective of improving Quality and respect for the Environment related to its design activity, carried out mainly in the field of civil engineering and in particular in the field of infrastructure. The relationship with entities and companies has required since 2004 the achievement of the necessary requirements for qualification in the suppliers' register with the aim of implementing, maintaining and improving a Quality and Environment System in accordance with ISO 9001 and ISO14001. Improvement takes the form of periodic review of the activities carried out by CODING through management audits.

In particular:

The goals of the Company are:

- a) To understand how the respective market sector develops and to be constantly updated.
- b) Pursue in all projects the satisfaction of the client through knowledge of his needs
- c) To bring innovation to the industry
- d) Respect the Environment
- e) Maintain legislative compliance
- f) Contain the production of solid waste

The Commitments of the Company are:

- a) Maintain the effectiveness of qualification in the registers where the same is required.
- b) Remember that the first and irreplaceable resource is people with their experience and expertise
- c) Bringing client expectations to our team
- d) To keep the company's Quality and Environment System active, effectively and efficiently
- e) Confirming the commitment to reducing the use of resources (electricity, water consumption).

Achieving goals and keeping commitments requires the maximum involvement and cooperation of all personnel; therefore, management is committed to providing all support for the continuous improvement of activities.

Rome, 07.12.2017

L'AMMINISTRATORE
Dott. Ing. Giuseppe Fabrizio Coppa
